

NOTE AUGUST 2007

Protection of reports / ABAP®s

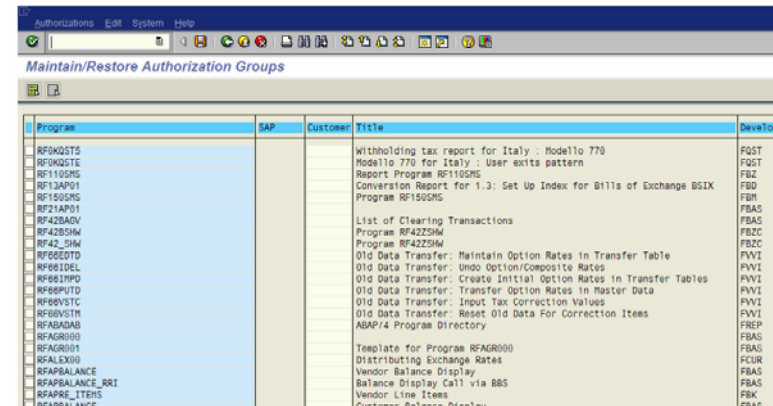

The protection of reports is set up according to the same principle as the protection of tables, only that SAP® does not provide many standard assignments. The assignment to users succeeds with the authorization object S_PROGRAM. The authorization object consists of two fields. First the field *User action ABAP/4 program* and secondly the field *authorization group ABAP/4 program*. The assignment succeeds with the latter.

You can get an overview of the already maintained assignments with the table TRDIR via transaction code SE16N. An authorization group would be entered to the field **SECU** (authorization group).

Field name	F-value	To value	More	Output	Technical na
Program name				✓	NAME
Source code protecti				✓	SQLX
Editor lock flag				✓	EDTX
Upper/lower case				✓	VARCL
Application database				✓	DBAPL
Logical database				✓	DBNA
Program class				✓	CLAS
Selection scm				✓	TYPE
Automatically genera				✓	OCCURS
Program type				✓	SUBC
Application				✓	APPL
Authorization group		SECU		✓	SECU

The maintenance for the assignment of reports to authorization groups can be executed with the report **RSCSAUTH** via transaction **SE38/SA38**.

Program	SAP	Customer	Title	Develop
RF0KQST5			Withholding tax report for Italy : Modello 770	FQST
RF0KQST5			Modello 770 for Italy : User exits pattern	FQST
RF115GNS			Report Program RF115GNS	FQZ
RF13AP01			Conversion Report for 1.3: Set Up Index for 0111s of Exchange 05IX	FBR
RF155GNS			Program RF155GNS	FBR
RF21AP01				FBR
RF42BAGV			List of Clearing Transactions	FBA5

RFABADAB			ABAP/4 Program Directory	FREP
RFAGR000			Template for Program RFAGR000	FBA5
RFAGR001			Distributing Exchange Rates	FBA5
RFALX00			Vendor: Balance Display	FBA5
RFAPBALANCE			Balance Display Call via BBS	FBA5
RFAPBALANCE_RRI			Vendor: Line Items	FBA5
RFAPRE_ITEMS			Customer Balance Display	FBA5
RFARRANFZ				FBA5

SAP® does not provide many entries here, as already mentioned.

You can however enter the desired values in the field *Customer* with the help of this report and have it saved. These maintained values will then be directly transferred into the table TRDIR.
